**Topic - Impact of COVID-19 on health care professional**

### **Introduction :**

The world comes to know , nothing can makes us happy with including money, properties etc. Yes,we can just ask a question to our self " why we stayed in home ".a year child will answer " Corona virus ". Yes , it is commonly known as "Corona virus" but , according to health care professionals it is COVID -19 . It mean " Corona virus disease 2019". Not engineers ,polices etc can deal with it , only the health care professionals are needed to deal with it.it may includes Doctors , Nurses , paramedics, pharmacists etc.we are looking to the world , every day thousands of people's are loosing their life by this disease.it is due to the improper preparation to face the deadly disease.

### **Body**

Health care professionals are the personnel's who, plays a prominent role to deal with COVID-19.without they we can't imagine the world.

There is wide range of health care professionals includes Doctors, Nurses,paramedics,pharmacists etc.everyone will plays eminent role to treating Covid 19 patients.

Everyday it's a challenge to health personnel about the patients because due to unavailability of vaccines , there is chance for death and it also leads in high mortality.health care team have a high risk of getting disease because they will be closer to the patients a day while.it also leads to further complications in their life.

### **Impacts**

In everything we can find good and bad.because nothing will not good for more days.it also include good impacts and bad impacts.they were

### **Good impacts on health care professionals**

\*It gives a opportunity to treat a patient and to be part in "**world health emergency**"2020

\*Health care professionals can exhibit their dedication/ services towards profession.

\*It makes health professionals to be strong and to face this endemic diseases.

\*To sacrifice and stepping a service towards humanity.

\* Support by the government and colleagues.

\* Providing financial assistance to the health care professionals and insurances.

\* Protection against the exploit by the patient and their attenders.

### **Bad impacts on health care professionals**

\*They won't get sufficient time to meet their family members

\*They must be quarantine for last 14 days after their duty in hospital.

\*They feel difficulty to spend time by wearing **PPE** (personal protection equipment).

\*Altered in sleep, food etc , it makes little suffer to health personnel.

\*Facing problems in community and society by arrasing on health care team.

### **Conclusion**

Health care professionals plays a prominent role in treating Covid 19 patients.for this reason, the death rate is decreasing day by day.for the dedication and sacrifice of health care professionals,**Thank you** is the smallest word.they were the god angles, came to earth to save the patients.being responsible citizens we should salute the Corona warriors and we should join our hands in preventing the spreading of disease by proper measures.by staying at home , being humans we can support them indirectly by spreading of Corona.
