## About JSS College of Nursing, Mysuru

JSS College of Nursing, Mysuru, established in November 1997 under the visionary leadership of His Holiness Jagadguru Sri Shivarathreeshwara Deshikendra Mahaswamiji, is a premier centre of excellence committed to advancing nursing education, clinical practice, and research. As the first Nursing college in Mysuru and the pioneer in introducing postgraduate programs, it prepares highly competent professionals through quality education as a constituent of Rajiv Gandhi University of Health Sciences, Bengaluru. A major strength of the college is its integration with JSS Hospital, a 1,800-bedded multi-specialty tertiary care teaching hospital, offering students extensive clinical exposure, advanced diagnostic and therapeutic services, and opportunities to practice evidence-based care. Complementing this, the Skill and Simulation Center at JSS Academy of Higher Education & Research provides a safe, technology-driven environment to refine clinical skills, critical thinking, and decision-making. Together, these facilities ensure seamless translation of theory into practice, shaping compassionate nursing professionals and researchers equipped for global healthcare and academic collaboration

### About Conference:

In today's dynamic global health landscape, nursing stands at the intersection of science, practice, and compassionate care. This conference offers a vital platform for professionals, researchers, educators, and students to integrate evidence-based practice and leadership, driving excellence and equity in healthcare. By connecting groundbreaking research with real-world application, it fosters collaboration to shape the future of nursing through sessions on data, technology, and global perspectives in tackling pressing health challenges. Complementing the conference, an intensive one-day workshop will focus on sampling methods—the foundation of robust research—highlighting how well-chosen strategies ensure validity and reliability. Designed for nursing professionals, researchers, and students, the workshop combines theory with hands-on activities to demystify sampling and equip participants with essential skills to select and apply appropriate techniques, bridging the gap between theory and practice

## PRE-CONFERENCE:

### Sampling Strategies in Research: Choosing the Right Approach for Valid Results

#### Conference Objectives

- To explain the core principles and various types of sampling techniques used in nursing research.
- To enhance participants' ability to critically appraise and select the most appropriate sampling strategy for a given research question.
- To provide practical, hands-on experience in applying sampling methods through real-world case studies and exercises.
- To enable participants to calculate appropriate sample sizes to ensure adequate statistical power and validity of research findings

#### DOMAIN SPEAKERS

**Prof. Gangaboraiah Andanaiah**  
Professor Emeritus and Research Head  
Dayanand Sagar College of Dental Sciences
